# Literal or Inferential?

Two kinds of **questions** about a story

**I am learning to** tell **literal** and **inferential** questions apart

**Success criteria:**

- ☐ I can find an answer that is right there
- ☐ I can use clues and what I know to infer

## Literal

- The answer is **right there** in the book
- I can **point** to it with my finger

---

What color is the dog?
Brown.

## Inferential

- Book clues **plus** what I already know
- I have to **think** to find it

---

Sam is crying, so he must be **sad**.

**Book clues + my brain = an inference!**
