Perimeter with a Missing Side

1. **Write what you know**

   P = 20 cm. Sides: 6, 4, 6, ?

2. **Add the known sides**

   6 + 4 + 6 = 16

3. **Subtract from the perimeter**

   20 – 16 = 4 cm

In a rectangle, **opposite sides** are equal. That's a big clue!
